Dynatex is an ISO 9001 certified manufacturer and packager of branded and private label chemicals for everyday Automotive, Heavy Duty and Industrial Maintenance Markets

Ordering Information

Dynatex Part No.	Description & Size	Units Per Case
47205	DynaPlus Fast Cure Low Volatile Gasket Maker 5FL Oz. Cartridge	6
47206	DynaPlus Fast Cure Low Volatile Gasket Maker 6.75FL Oz. Automatic Can with Trigger	6
49556	Aluminum Anti-Seize 6.75FL Oz. Automatic Trigger Can w/ Brush Applicator	6
49660	Ceramic Disc Brake Grease 6.75FL Oz. Automatic Trigger Can w/ Brush Applicator	6
49633	Silicone/Dielectric Grease 8 Oz. Brush Top Bottle	12
49636	Silicone/Dielectric Paste 200 - 2gm Pouches per Jar	2

Aluminum Anti-Seize is a heavy duty economical industrial grade Anti-Seize Lubricant that contains finely divided metallic particles in a special no melt petroleum base grease all in a “Newly Designed” Automatic Trigger Can with Brush Applicator.

Ceramic Disc Brake Grease is a pure synthetic, high concentration dry-film, boundary lubricant treated with the latest rust, oxidation and anti-wear additives to provide lasting protection against friction, wear and corrosion. A superior noise dampening compound that will last the life of the brake pads and shoes hence reducing customer comebacks resulting from noise complaints. It will stay in place to protect at extreme temperatures from -50° F to +3,000°F. Designed to be compatible with most plastics and rubbers, especially ethylene propylene rubber (EPDM, EP, or EPT) commonly used in brake caliper systems.

DynaPlus “Fast Cure” Low Volatile Gasket Maker - Functional equivalent to Right Stuff™ is a “thicker” elastomeric rubber used by technicians to replace cut gaskets. DynaPlus is manufactured to meet or exceed OEM specs as well as being O₂ sensor safe. Designed to provide increased resistance to oil, water, anti-freeze, transmission fluid and many other shop fluids. DynaPlus offers greater gasket “blowout” resistant and problems due to vibration. Applications include valve covers, transmission parts, oil pump flanges, timing gear and differential covers, water pumps and much more.

Silicone/Dielectric Grease is a smooth, easily spreadable silicone grease that protects electrical connections and wiring from water, dirt and corrosion (salts, alkalines, and magnesium chloride). Maintains its consistency in extreme temperatures from -40°F to +400°F. Displaces moisture, prevents moisture, prevents fusion of spark plug wires and prevents voltage leak. Ideal for transportation and marine industry applications.
