Anaerobic Threadlockers are single component liquids. These adhesives are called anaerobics because they crosslink and cure only in the absence of oxygen. The threadlockers provide a positive seal that resists most liquids. Locks and seals metal threaded assemblies in a wide range of applications. Prevents nuts, bolts and other fasteners from loosening due to vibration. Works in temperature from -65F to 350F (-54C to 177C). Fixture tight in minutes. Protects against thread corrosion. *For faster cure times use the Dynatex 49674 primer.*

Dynatex is an ISO 9001 certified manufacturer and packager of branded and private label chemicals for everyday Automotive, Heavy Duty and Industrial Maintenance Markets
